

Inslaganker L-lijm/dunbed

The flat L-shaped anchor for narrow facing bricks is a reliable fastening solution for anchoring in masonry structures. The key feature is the flat, angled shape, which allows for easy placement in narrow facing bricks. Thanks to the smart design, the anchor is securely positioned in the outer shell and integrates effortlessly into narrow bed joints without compromising the stability of the structure.

1.4362 stainless steel

A: Length (+2 mm / -2 mm) | B: Thickness 3,92 mm (+0 mm / -0,03 mm) | D: Thread length 60 mm (+5 mm / -5 mm)
F: Height of wave / L 33 mm (+3 mm / -3 mm) | G: Thread outer diameter 4,6 mm (+0,1 mm / -0,1 mm)
M: Crest length 6 mm (+1 mm / -1 mm)

Art. No.	Product description	Dimension	VPE
1260584	Inslaganker L-lijm/dunbed A2 - 210 mm	4 x 210 mm	250
1260585	Inslaganker L-lijm/dunbed A2 - 230 mm	4 x 230 mm	250
1260586	Inslaganker L-lijm/dunbed A2 - 250 mm	4 x 250 mm	250
1260587	Inslaganker L-lijm/dunbed A2 - 270 mm	4 x 270 mm	250
1260588	Inslaganker L-lijm/dunbed A2 - 290 mm	4 x 290 mm	200
1260589	Inslaganker L-lijm/dunbed A2 - 330mm	4 x 330 mm	200
1260590	Inslaganker L-lijm/dunbed A2 - 370mm	4 x 370 mm	200
